

Building an AMP Compatible WordPress Site

Workshop Requirements

Workshop Requirements

1. Download and install Local by Flywheel

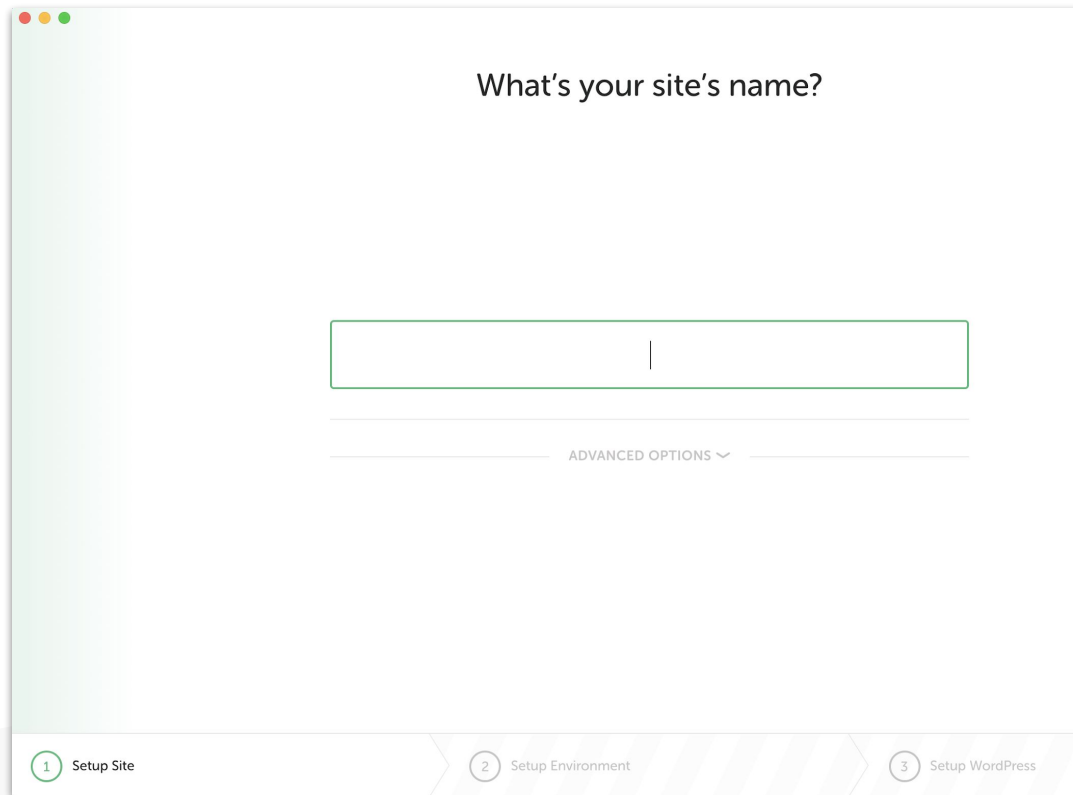

localbyflywheel.com

The screenshot shows the homepage of the Local by Flywheel website. The background is a solid green color. At the top right, there is a blue banner with the text "NEW: Power up your workflow with Local Pro!" and a "LEARN MORE" button. Below this, the "LOCAL by Flywheel" logo is centered. To the right of the logo, there are navigation links: "FEATURES", "PRO ^{NEW!}", "PRICING", "ADD-ONS", and "LABORATORY". The main content area features the headline "The #1 local WordPress development tool" in white text. Below the headline is a sub-headline: "Stop debugging local environments and spend more time launching WordPress sites." There are two buttons: a dark green "FREE DOWNLOAD!" button and a white "Watch our video >" button. On the right side, there is an image of a laptop displaying the Local Pro interface, a small robot figurine, and a potted plant. At the bottom of the page, there is a white banner with the text "Delightful & powerful features" in green.

Workshop Requirements

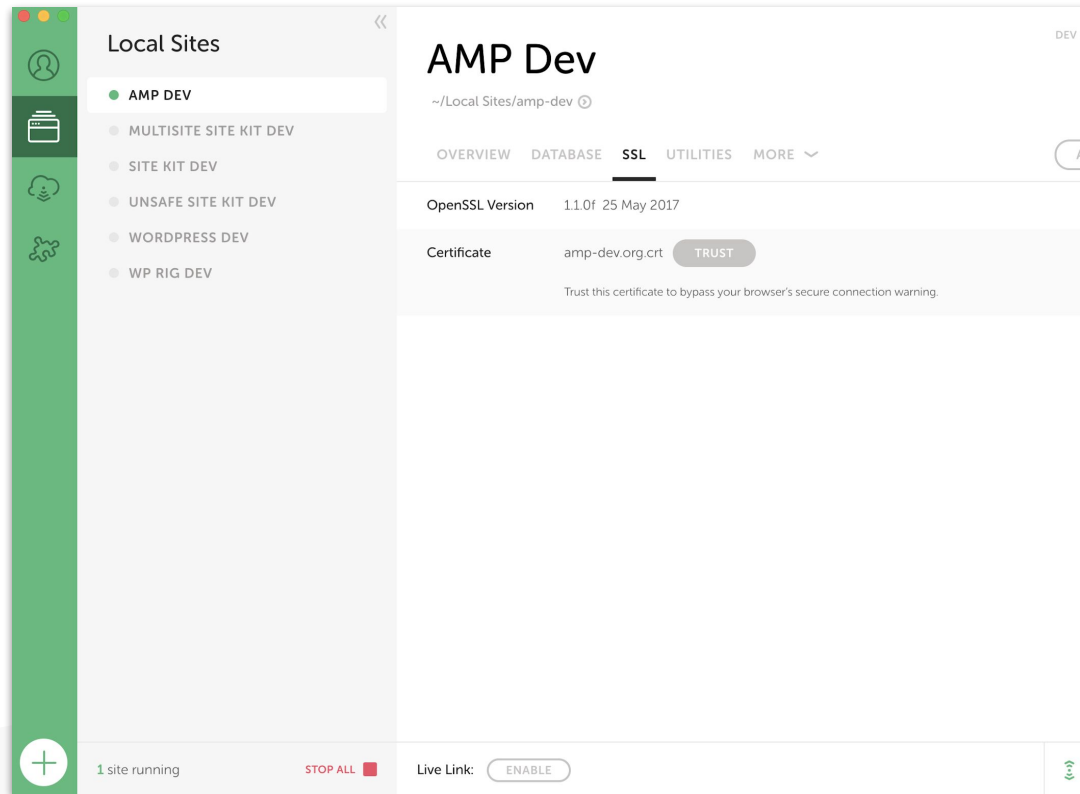

2. Set up a new site

Workshop Requirements

3. Trust the new site's SSL certificate

Workshop Requirements

4. Download the setup script into the site's /app directory

felix-arntz.me/wcsev19

TODO: Screenshot & Link

NEW: Power up your workflow with Local Pro! [LEARN MORE](#)

LOCAL
by Flywheel

FEATURES PRO ^{NEW!} PRICING ADD-ONS LABORATORY

The #1 local WordPress development tool

Stop debugging local environments and spend more time launching WordPress sites.

Delightful & powerful features

Workshop Requirements

5. SSH into the new site's Docker container

The screenshot shows the 'Local Sites' interface for a site named 'AMP Dev'. A context menu is open over the site, with 'Open Site SSH' highlighted. The site configuration details are as follows:

Category	Value	Action
Local Environment	Preferred 1.3.2	CHANGE
Web Server	nginx	
PHP Version	7.2.9	ⓘ
MySQL Version	5.7.23	
WordPress Version	5.2.2	
Site Name	AMP Dev	
Site Domain	amp-dev.org	CHANGE
Site Path	~/Local Sites/amp-dev	
Multisite	No	

At the bottom of the interface, it shows '1 site running', a 'STOP ALL' button, and a 'Live Link' button set to 'ENABLE'.

Workshop Requirements

6. Run the downloaded script

A screenshot of a terminal window with a dark blue background. The window title bar shows three colored dots (red, yellow, green) on the left and the text '2. AM' on the right. The terminal text is as follows:

```
/Users/felixarntz/Library/Application\ Support/Local
Last login: Mon Aug 19 18:50:10 on ttys002
+ ~ /Users/felixarntz/Library/Application\ Supp
-n -e
root@b7a2ad09a370:/# sh ./app/wc-sevilla-setup.sh
```
